

CareCub IS HIRING!!!

Looking for **AI Engineer / AI Builder** (Intern / New Grad welcome)

If you want to actually build with AI, not just learn it

What you'll be working on

- Build AI agents / sub-agents for "insurance exploration >> consulting >> sales"
- Create automation workflows (with LLMs, APIs)
- Run real experiments
- Work hands-on with tools like Claude, Cursor, etc.

Environment

- Work closely with founders + senior team
- International environment (we currently have colleagues from SEA so communicate in english is preferred)
- Mostly remote
- 1 day in-person meetup (office in Pattanakarn but flexible to meetup in city/ Chula/etc.)

What you'll get

- AI tools & subscription support
- Free credits to build & experiment (and we got you free Lovable Credits!)
- Real-world experience

Who we're looking for

- Students / fresh grads (any year welcome)
- Interested in AI, automation, building things
- Comfortable with trying new things & learning fast
- Some coding (e.g. Python / JS / APIs) is a big plus
- Can communicate in English

You'll fit well if you are

- Hungry to improve fast
- Prefer building over just learning
- Curious about startups / entrepreneurship
- Someone who thinks: "how can I make this work?"

If this sounds like you, drop your contract
